Relation about shima seiki visit

STANDARD KNITTING PROCESS

The most expensive phase

Sampling X n° of variations (colours, detail, size)

Possible modifications

Sampling costs

Machine costs

- Of use
- Dead time

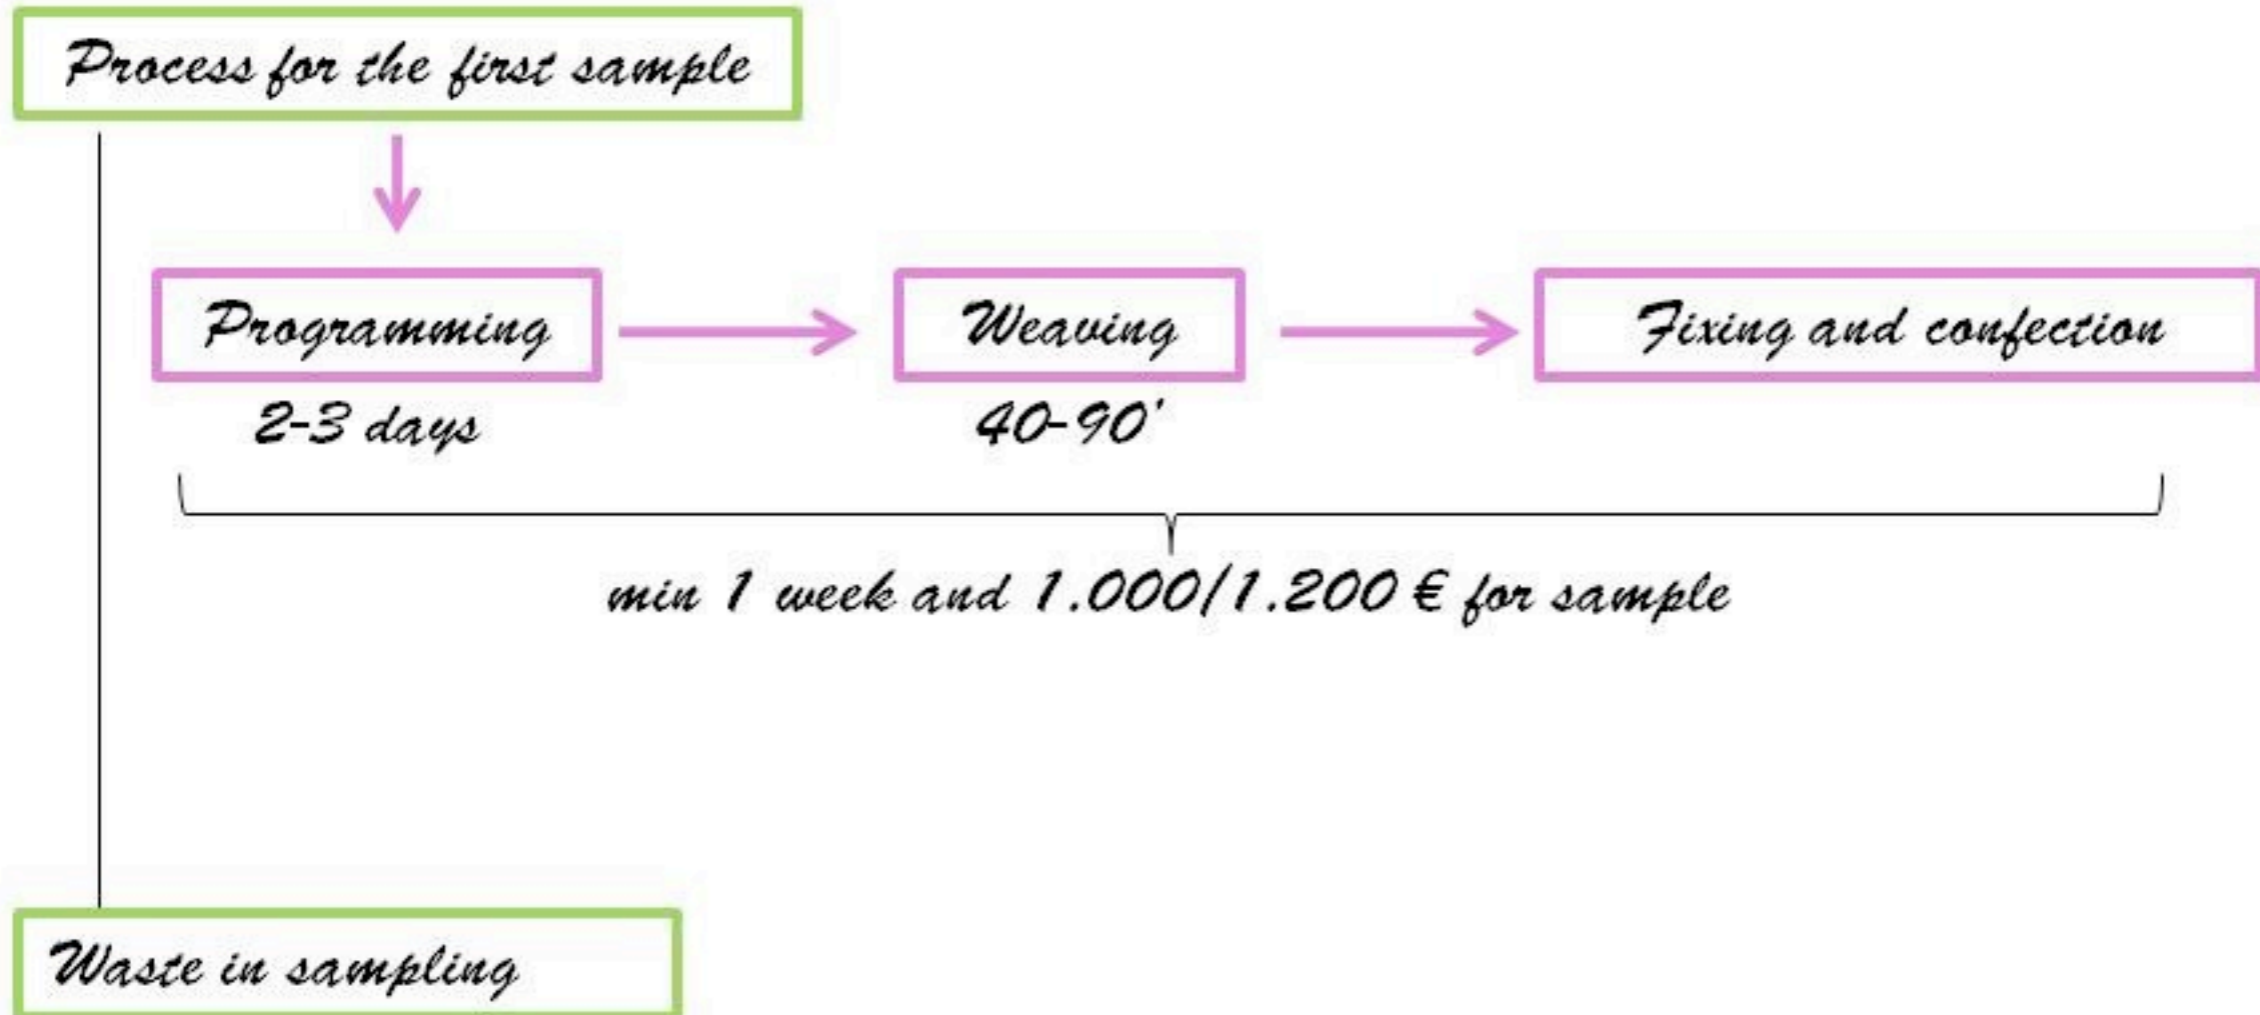

Work costs

- Programming
- Threading
- Technician check
- Confection
- Treatments (washing and ironing)

Material costs

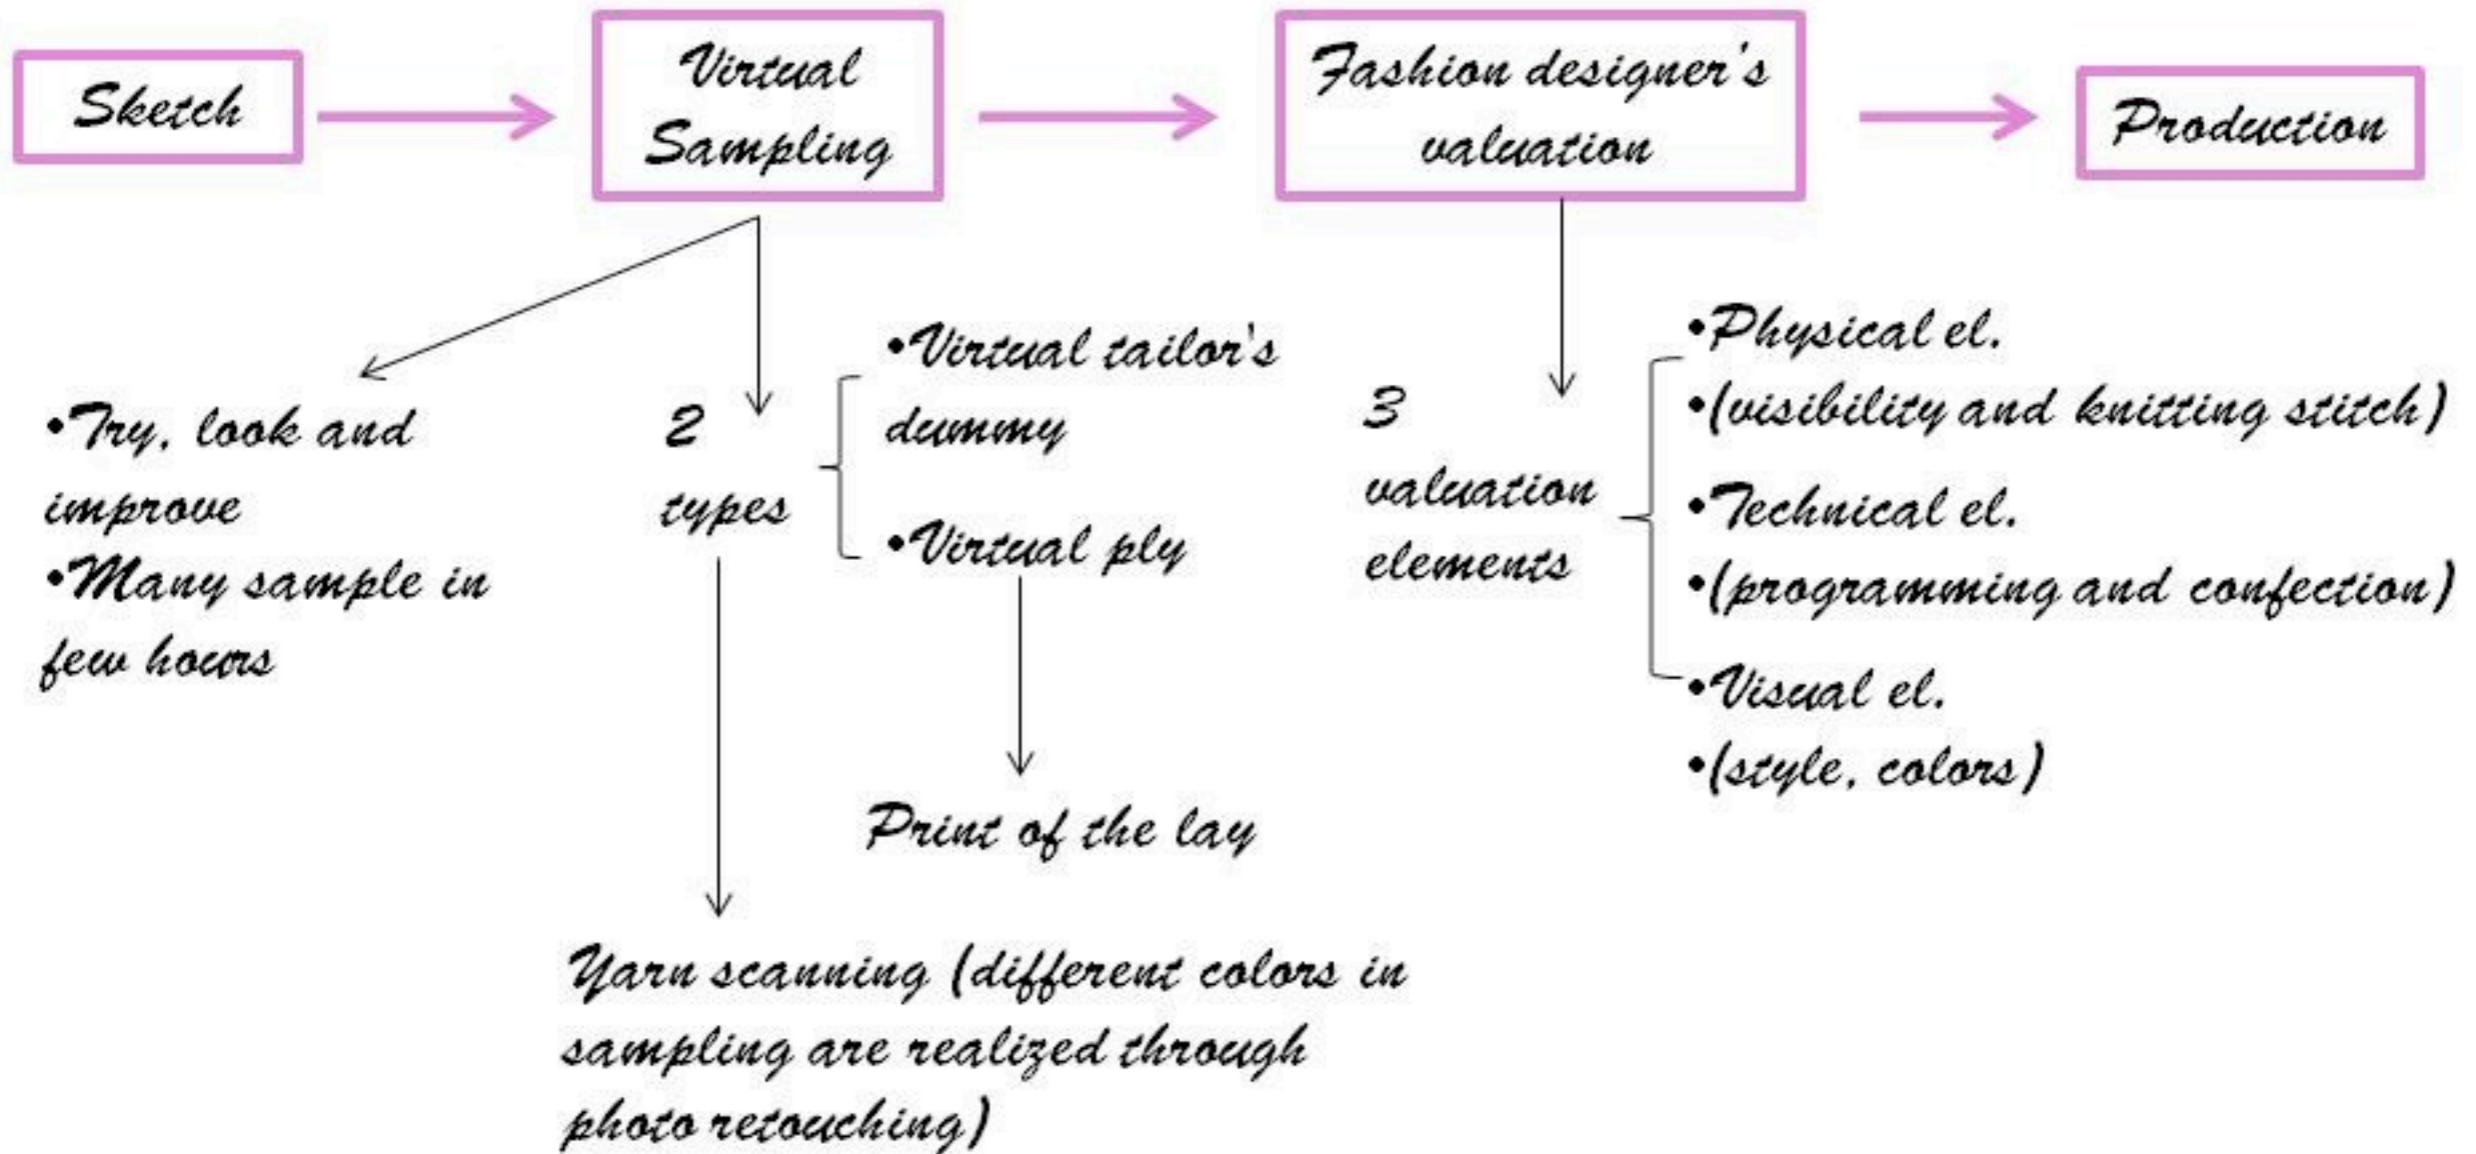

STANDARD KNITTING PROCESS

STANDARD KNITTING PROCESS

How many garments are chosen and how many are discarded by the fashion designer before the requested one is identified

SATMA SETKI KNITTING PROCESS

Cost cut → 30/50% due to

- Less length of process
- Less waste in sampling

Thanks to pc simulation
